Introtech KMS-M6D

The design of the industrial-grade standard drying tester complies with the parameters of AATCC household washing test methods TM88B, 88C, 124, 130, 135, 142, 143, 150, 172, 179 and 188 described in AATCC M6 Monograph and LP1 Standard requirements.

Feature

△ Precise mechanical control, easy to use, to ensure reliable performance.

△ The frame adopts a sturdy industrial design

△ Durable galvanized steel drum

△ American 10.5Kg large capacity drum

△ Quiet and efficient blower system with an air flow of 220 cubic feet/meter per minute for fast drying and reducing operating cost

△ Efficient drying and heating

△ Voltage: 220V 50Hz /60Hz

Power： 4800W

N.W: 62kg

Packing size: 750 x 775 x 1143mm (H x L x D)
Machine size: 683 x 711 x 1092mm (H x L x D)
